DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference characters: "503" (page 33 line 19) and "530" have both been used to designate subtank, perhaps meant "530"; "100" (page 16 line 10) and "201" (page 13 line 26) have both been used to designate main body. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: Fig. 4, Ref. 100 (page 13 line 17); Fig. 2, Ref. 201 (page 13, line 26 & page 14, line 7); and Fig. 6, Ref. 405 (page 21 line 4). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the

Art Unit: 2853

applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

3. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character “100” has been used to designate both printer (page 13, line 8) and main body (page 16, line 10). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

4. The disclosure is objected to because of the following informalities: page 15, lines 15 and 18 “medial”, perhaps meant “media”.

Appropriate correction is required.

5. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: Claims 1 and 9 (page 49 lines 14-25; page 52 lines 3-14) are interpreted by the examiner to perform all of the functional limitations (last paragraph of claim) regarding the measuring means and supplying means regardless of whether one of the limitations has been

Art Unit: 2853

met. Therefore, the claim is unclear as to the metes and bounds that applicant considers to be the invention.

6. However on the contrary the specification does distinctly point out selection of one of the functional limitations (Figs. 9A & 9B; Page 33 Line 33 – Page 36 Line 3). The claim language is required to be amended to correspond to the language as disclosed in the specification.

Claim Objections

7. Claim 8 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. With regards to claim 8, claim 8 does not contain any new limitations not presented in claim 1.

Claim Rejections - 35 USC § 112

8. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

9. Claims 1 and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

10. Claims 1 and 9 fail to point out a time frame (when the measuring and comparing is to be performed) for measuring means, which allows for comparing each functional limitation therefore allowing all functional limitations to be met. Claims 1 and 9 specifically fail to point out whether only one or multiple functional limitations are to be met, and the syntax renders the metes and bounds of the invention unclear.

Allowable Subject Matter

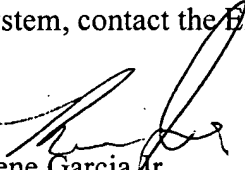

11. Claims 2-7 and 10 are objected to as being dependent upon a rejected base claim.
